

List of residues of active substances of pesticides in fresh food products of plant origin fixed by Russian legislation in accordance with Hygiene Standard (GN) 1.2.1323-03, which we analyse in our laboratory in 2008:

Azoxystrobin	Prochloraz
Acetamiprid	Procymidone
Benomyl	Spiroxamine
Bifenthrin	Tau-fluvalinate
Buprofezin	Tebuconazole
Deltamethrin	Thiabendazole
Desmedipham	Thiakloprid
Diazinon	Thiamethoxam
Dimethenamid	Thiophanate – methyl
Dimethoate	Thiram (sum of dithiocarbamates)
Dimethomorph	Tolyfluanid
Difenconazole	Tiadimefon
Imazalil	Trifluraline
Imidacloprid	Trifloxystrobin
Iprodione	Famoxadone
Captan	Fenazaquin
Carbendazim	Fenarimol
Carbofuran	Fenitrothion
Clomazone	Fenoxycarb
Clofentezine	Fludioxonil
Krezoxim-methyl	Flutriafol
Lambda cyhalothrin	Phosalone
Malathion	Folpet
Mancozeb (sum of dithiocarbamates)	Chloridazon
Metalaxyl	<i>Chlorpyrifos</i> (reported level is 0,01 mg/kg)
Metiram (sum of dithiocarbamates)	Chlorothalonil
Metribuzin	Cyneb (sum of dithiocarbamates)
Parathion methyl	Cypermethrin
Pendimethalin	Cyprodinil
Penconazole	Epoxiconazole
Permethrin	Esfenvalerate
Pyridaben	Ethofumesate
Pirimithos methyl	
Pyriproxyfen	
Prometryn	
Proparqite	
Propiconazole
